

CHAIRS BUILT TO FIT YOUR BODY, YOUR SPACE, YOUR STORY.

50 YEARS OF CRAFTSMANSHIP. ONE CHAIR AT A TIME.

LIFEFORM Chairs | Est. 1976

Five Generations in the Making

Before LIFEFORM was a chair company, we were upholsterers, woodworkers, saddle makers, and craftspeople working with our hands. That's where it began: in Denmark with our great, great grandfather in the late 1800s, quietly honing the skills that would carry through generations.

In 1976, LIFEFORM was born with one goal: to build seating that felt as good as it looked. Supportive. Enduring. Made for real life.

Today, as we celebrate 50 years, that mission hasn't changed. What has changed is how far we've come. From local shops to global workspaces, from hand tools to ergonomic technologies. But through it all, we've never stopped building chairs the way we always have: one at a time, for one person at a time.

Why LIFEFORM Chairs Feel Different

YOU CAN FEEL THE DIFFERENCE THE MOMENT YOU SIT DOWN, AND LONG AFTER

Most chairs are built for the average person, made fast and made to be replaced. We've never worked that way. At LIFEFORM, every chair is built with purpose in our Calgary workshop, shaped by skilled hands using time-tested methods and better materials. Because when something's made carefully, it shows up differently in your life. It lasts longer. It feels better. And it gives more back over time.

We've always believed in fewer, better things. Long before sustainability became a selling point, we were sourcing locally, reducing waste, and building with care. Because that's what makes a product worth owning. It's not just about where it's made, or even how. It's about why: to support you, to last, and to matter.

This Is Comfort That Endures

Not just through long workdays, but through years of change, progress, and purpose.

*No One Else Builds Chairs Like This
Because No One Else Builds It for You*

MOST CHAIRS ARE MADE
TO FIT A MARKET

LIFEFORM CHAIRS ARE
MADE TO FIT YOU

We are the only manufacturer that will handcraft your chair, one at a time, with your choice of materials, fit, comfort features, and finishing touches. This isn't a "collection." It's a collaboration. And the result is a chair that reflects your needs, your space, and your sense of style, because you had a hand in shaping it.

From full-grain leathers to soft-touch vegan options, multiple seat sizes, to contrast stitching, everything is chosen by you, not pulled off a shelf. So it feels right from the first sit and stays meaningful long after.

When you invest in something that fits this well and is built this thoughtfully, it becomes more than a chair.

It becomes yours.

A woman with long brown hair, wearing a black t-shirt, is shown from the side, adjusting a white leather office chair headrest. She is using a silver metal tool with a black handle to adjust the chair's mechanism. The chair has a white leather finish with visible stitching. The background is dark, making the chair and the woman stand out.

Ergonomic Innovation

INNOVATION ISN'T A FEATURE IT'S A PRACTICE

At LIFEFORM, innovation isn't just something we've added over time, it's something we've always done. From introducing memory foam to modular seat design decades ago, to rethinking how movement and posture work together in our patented Core-flex® seat, we've made it our mission to push the boundaries of long-term comfort and well-being.

We study the way people really sit. We test, refine, and revisit every decision. Because comfort should feel effortless, not engineered.

And we're not done. With new technologies in development, the next generation of LIFEFORM seating is already in motion.

WHAT'S INSIDE A LIFEFORM CHAIR

SmartCore™ Seating Technology

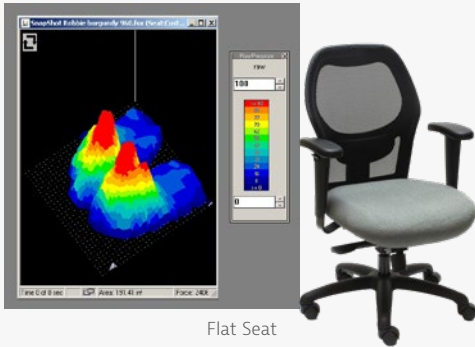

Our proprietary multi-layer system blends high-density support foam beneath memory foam to deliver pressure relief that won't bottom out. It's engineered to maintain structure over time.

Contoured Seat

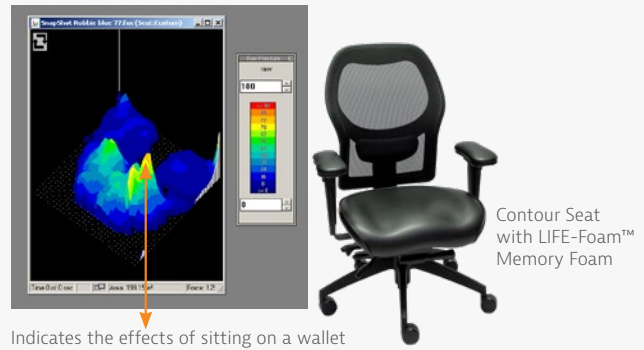

Sculpted to gently tilt the pelvis forward, it promotes a neutral spine and healthy posture, without forcing it. Rooted in biomechanics, this design helps reduce lower back strain and encourages natural alignment through long hours of sitting.

Results show the pressure mapping comparison of a 160 lb, 5'6" male seated on a flat seat and a Contour Seat with LIFE-Foam™ Memory Foam.

Sitting on a Flat Seat concentrates the Seated Pressure on the Sit Bones.

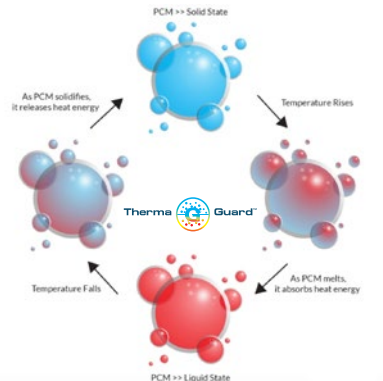

Sitting on a Contour Seat with LIFE-Foam™ Memory Foam evenly distributes the Seated Pressure.

Coccyx Cut-Out

By relieving direct pressure on the tailbone, the coccyx cut-out helps reduce discomfort and nerve compression, especially for those with lower back sensitivity or past injuries. It's a subtle feature with a big impact on long-term sitting comfort.

ThermaGuard™ Temperature Regulating Technology

Our ThermoGuard™ coating helps regulate heat buildup and dissipate excess body warmth. By keeping your seat cooler and more consistent in temperature, it helps you stay focused, balanced, and comfortable, especially during long stretches of work.

Modular Design

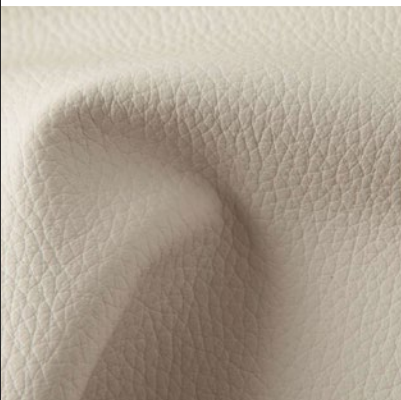

Our chairs aren't one-size-fits-all. They're built piece by piece to fit you. With multiple seat sizes, backrest options, and ergonomic features to choose from, our modular system lets you create the exact chair your body needs, right from the start.

Fabric & Finish Overview

WHERE COMFORT MEETS CHARACTER

Whether you prefer timeless and understated, or bold and personalized, you'll find options that let your style speak softly or stand out.

UPHOLSTERY OPTIONS

Choose from a carefully curated range of textiles and hides, each selected for its feel, durability, and ability to age beautifully:

- **Premium Top-Grain Natural Leather** – Rich texture, natural character, and timeless quality
- **Embossed Leathers** – Add depth and pattern with hand-selected textures
- **Vegan / PVC-Free Options** – Breathable, beautiful, and environmentally conscious
- **Performance Fabrics** – Engineered for resilience, stain-resistance, and long-term use
- **Specialty Textiles** – Faux suede, 3D knits, and other tactile upgrades

*“Every fabric tells a story.
Choose the one that feels like yours...”*

STITCHING, PIPING & EMBELLISHMENTS

Add subtle sophistication or a signature look with custom detailing:

- Contrast Stitching – Choose tone-on-tone or bold, high-contrast finishes
- Piping – Highlight your chair's curves with a clean, defined edge
- Quilted Panels – Diamond or specialty patterns for visual texture and plush feel
- Monograms / Logos – Personal or professional branding, stitched or embossed
- Two-Tone / Three-Tone Combinations – Mix colors or textures for a completely custom aesthetic

WOOD & BASE FINISHES

Give your chair a solid foundation, both functionally and visually:

- **Traditional & Modern Wood Base Options** – Available in multiple stain finishes to match your space
- **Aluminum Base Options** – Sleek satin black or silver for a modern touch
- **Ultimate Wood Package** – Coordinated arm accents, upholstered sleeves, and base in matching wood tones
- **Casters / Wheels** – Choose from soft-surface, locking, or designer options for smooth rolling and smart styling

SEE & FEEL FOR YOURSELF

Explore our full swatch library in person or online:

"The right material isn't just about how it looks, it's about how it feels every time you sit down."

Choose Your Comfort, Your Way

NOT EVERYONE WORKS THE SAME,
THAT'S WHY WE DON'T BUILD JUST ONE CHAIR

At LIFEFORM, we don't believe in one-size-fits-all. Our product families are designed to give you choice, real choice: different profiles, different levels of customization, different ways to sit and feel supported.

But no matter which chair you choose, the experience is the same: handcrafted quality, ergonomic support, and options that reflect your needs, your space, your story.

Ultimate Executive™ High-Back

(MODEL 2390)

WHERE CRAFT MEETS HERITAGE, AND COMFORT LASTS A LIFETIME

Some chairs are built to last a season. This one is built to last a career.

The Ultimate Executive™ is the result of five generations of craftsmanship, shaped by hand, guided by experience, and built for lasting comfort.

At its core is our SmartCore™ seating system: a multi-layered design engineered to support long hours without wearing down. Every curve, every feature is thoughtfully designed to adapt to your body and the way you work.

Built in Canada. Trusted worldwide. Made to stay with you.

Specialty Seating

SUPPORT BEYOND THE CHAIR

Not all work happens in a traditional seat. That's why we've designed a range of supportive, posture-friendly stools that complement how and where you move throughout the day.

From active stools that keep your body engaged, to footrests that take pressure off your legs and lower back, each piece in our specialty collection is crafted with the same care and intention as our chairs, because every detail matters.

SUPPORT THAT MOVES WITH YOU

In workspaces where movement matters, the right stool supports more than posture, it supports performance.

Handcrafted in our Calgary workshop, the Saddle and Contour Stools are designed for active comfort, encouraging alignment while keeping you mobile and focused.

Ideal for medical, aesthetic, lab, or task environments where mobility and support go hand in hand.

(MODEL 200)

Saddle & Contour Stools

(MODELS 200 & 250)

(MODEL 250)

KEY FEATURES

SADDLE STOOL (200)

- **Ergonomic Saddle Design**
Tilts pelvis forward to support upright posture and reduce lower back strain

LIFE-Line™ Medical Seating Series

PURPOSE BUILT SUPPORT FOR PROFESSIONALS WHO NEVER SIT STILL

In the medical, wellness, and aesthetics world, your chair isn't just a seat, it's part of your workflow. The LIFE-Line Series was designed with that in mind.

This collection of stools and task chairs supports the unique demands of care providers, practitioners, and clinicians who need flexibility, stability, and all-day ergonomic support without ever getting in the way. Every model in the LIFE-Line family is handcrafted with the same care and attention to detail as our executive seating because no matter where you work, how you sit matters.

LIFE-Line™ Medical Waterfall Chair

(MODEL LM160)

COMPACT FORM, FULL ERGONOMIC FUNCTION

The LIFE-Line Waterfall Chair offers focused ergonomic support in a compact, clinic-ready design.

Its sculpted flat seat with a waterfall edge encourages healthy posture, while the adjustable backrest and task mechanism provide full control in smaller workspaces.

Ideal for practitioners and technicians who need comfort that keeps up.

(MODEL LM160)

KEY FEATURES

- **Cleanable Upholstery**
Meets Healthcare Without Harm's Healthy Interiors Criteria V2.4
- **Flat Seat with Waterfall Edge**
Reduces pressure on the backs of the legs to support healthy circulation and posture

Posture Supports

Our Posture Support collection includes seat cushions and footrests designed to enhance comfort, alignment, and performance wherever you sit. Whether you're in a LIFEFORM chair, another seat, or on the go, these accessories bring ergonomic intelligence and handmade quality into every corner of your day.

They're simple tools that make a noticeable difference and a perfect starting point for better posture and lasting comfort.

SUPPORT FROM THE GROUND UP

True comfort doesn't stop at the seat. It starts at your feet.

The LIFEFORM Executive Footrests promote better posture and circulation by elevating your legs and reducing pressure on your lower back, especially during long hours at your desk.

Handcrafted in our Calgary workshop with premium materials, they create a supportive foundation that enhances comfort from the ground up.

Executive Seat Cushions

(MODELS LSCEX01 & LSCEX02)

BRING LIFEFORM COMFORT ANYWHERE

Not every chair is built for all-day comfort, but that doesn't mean you have to sit in pain. Whether you're at the office, in the car, or at the kitchen table, LIFEFORM Executive Seat Cushions transform any seat into one that supports you better.

Built with the same pressure-relieving LIFE-Foam™ memory foam and ergonomic sculpting used in our chairs, these portable cushions reduce strain, improve posture, and keep you more comfortable, wherever life has you sitting.

(MODEL LSCEX02)

(MODEL LSCEX01)

KEY FEATURES

- **LIFE-Foam™ Memory Foam Core**
Gently conforms to your body for personalized pressure relief and long-lasting comfort
- **Hidden Coccyx Cut Out**
Discreetly designed, the rear section of the seat foam can be easily removed for comfort, or replaced when no longer needed, alleviating pressure on the tailbone and offering adaptable support for lower back and coccyx relief
- **Contoured or Wedge Design Options**
Choose the flat bottom contour to soften hard seating or the angled wedge to tilt the pelvis forward and promote upright posture
- **Removable Upholstered Cover**
Durable, zippered cover in premium DreamWeave™ fabric or Brisa® Ultrafabrics®, easy to remove for cleaning
- **Portable & Versatile**
Lightweight enough to take from home to car to office. Comfort that moves with you
- **Ergonomic Support Without the Chair**
Ideal for adding ergonomic benefits to seats that don't offer built-in support

CUSTOMIZATION OPTIONS

Select from

- **Multiple upholstery materials including Brisa® or durable DreamWeave™ performance fabric**
- **Coordinated colors and textures to match your chair or environment**

Our Legacy in the Making

COMFORT THAT'S BEEN GENERATIONS IN THE MAKING

Before LIFEFORM had a name, it had a way of working. Hands on, honest, and grounded in the belief that good things are built to last. Our story began five generations ago in a Danish saddle and upholstery shop, where fit and comfort weren't just ideals, they were requirements. That same philosophy came with our family to Calgary, where furniture was made by hand, and made to serve.

We didn't follow trends, we followed people. We listened. Learned. Adapted. Every improvement we've made, from materials to mechanisms, was shaped by real feedback, real bodies, and the belief that everyone deserves to feel supported in the spaces they use every day.

That's why today, we still build every LIFEFORM chair one at a time, by people who care. Crafting not just for comfort, but for the relationships that shape it.

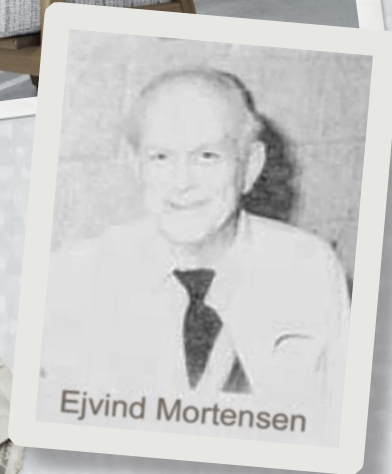

Follow our history, and you'll see what shaped us.

Decade by decade. Conversation by conversation.
Chair by chair.

Our Story Begins...

| 1890s |

Our great-great-grandfather, Jacob Mortensen, begins saddlemaking and upholstery work by hand in Durup, Denmark.

| 1940s |

Our great-grandfather, Ejvind Mortensen, opened Durup Polstremøblefabrik (Upholstered Furniture Company) with his brothers, cementing the family's deep roots in furniture making.

| 1980s |

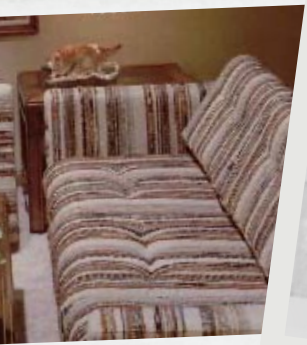

The rise of the computer age fuels growth and diversification in office chair design, prompting new developments in function and fit.

| 1990s |

Ergonomics and human factors take center stage. Johnny's children Dave, Sonja, and Chris Mortensen joined the company, continuing the family legacy.

| 1950s |

Our grandfather, Kai Mortensen, emigrated with his young family to Calgary, Canada, and opened Foothills Upholstery.

| 1960s |

Kai opened his namesake store, Interiors by Kai Mortensen, in what would later become Calgary's Design District. His son, Johnny Mortensen, learns the family trade building frames and upholstering custom residential furniture.

| 1976 |

Our father Johnny and his uncle, John Kristensen, establish Kamor Furniture Ltd., continuing to build custom furniture exclusively for Kai. Soon the company set on a new path into reception and task seating for the booming local commercial office market.

| 2000s |

In 2000, we officially became LIFEFORM. A name that reflected our focus on supporting the human form through thoughtful design. This decade also marked a new century, and with it, the continuation of a family legacy that began over 100 years earlier.

| 2010s |

Returning to our residential furniture roots, we offered deeper levels of customization and personalization, making every chair truly unique for each customer.

| 2026 |

LIFEFORM celebrates 50 years of proud Canadian craftsmanship. Our heritage and values continue to guide how we build; thoughtfully, sustainably, and one chair at a time.

As we look ahead, we remain focused on refining comfort, deepening personalization, and embracing innovation that enhances, not replaces, what we've always stood for. The next chapter begins, just as the first one did: with care, purpose, and craft.

...and Continues to This Day

Built for How You Sit. Made for How You Live

There are hundreds of office chairs out there, but only one is built to support you. The way you think, move, focus, and rest.

That's what makes a LIFEFORM chair different. It's not just the stitching or the foam. It's the intention behind every choice. It's how we've built for 50 years, and how we'll keep building for the next 50.

Because when something is made with care, it becomes more than a chair. It becomes part of your rhythm, your workspace, your life.

*Welcome to comfort that lasts.
Welcome to LIFEFORM*

MADE-TO-ORDER, WORTH THE WAIT

All LIFEFORM chairs are custom made one at a time, just for you, in our Calgary workshop. Because every build is unique, please allow 3–6 weeks for production.

We'll keep you updated along the way, and we promise it's worth the wait.

WHERE TO BUY

You can experience LIFEFORM through several channels:

- **Direct:** Customize and order directly through our website or by speaking with our team.
- **Showroom:** Visit our Calgary showroom to explore materials, sit in sample models, and receive personal fitting support.
- **Dealers:** Find LIFEFORM at select furniture dealers across North America.

TO THE TRADE

Designers, specifiers, planners, we work with you.

If you're sourcing for residential, workplace, or healthcare environments, we offer:

- **Designer & trade pricing**
- **Corporate & B2B incentives**
- **Custom material coordination**
- **Support for procurement teams & ergonomists**

To open a trade account contact us at:
info@lifeformchairs.com

WARRANTY & SUPPORT

We stand behind every chair we build. With a comprehensive warranty program and real, human support whenever you need it.

Whether you have a question, need a part, or just want guidance, our Calgary based team is here to help. Because great service should feel as personal as the chair you chose.
